## **ProfitKey International Enhances Lean Manufacturing Offer**

Salem, NH, January 2009 – ProfitKey International today announced Lean Manufacturing enhancements available in Release 7.6.1. The RRM Lean/Kanban engine can monitor the levels of any and all stocking locations, especially point-of-use locations, and trigger near instant replenishment orders as each location's quantity reaches a certain level.

According to Joseph J. DiZazzo, CEO and President, "Our advanced backflush feature released in Version 7.5.1 was the preliminary step in a functional Kanban system. We are excited that we were able to deliver these enhanced features 6 months earlier than scheduled."
