

ProfitKey Partners with RF IDEas to Sell Proximity, Contactless Card-Reading Manufacturing Solutions

SALEM, N.H., Oct. 21, 2009 -- ProfitKey International, a leader in providing manufacturing application systems, has become a reseller of RF IDEas' portfolio of proximity and contactless badge readers.

RF IDEas designs, develops, and manufactures proximity and contactless badge reader solutions that expand building access cards to hundreds of applications including time and attendance.

"ProfitKey is a natural fit for us because of its strong relationships with small- to mid-sized manufacturers that continue to seek innovative solutions to operate more efficiently and profitably," said Rick Landuyt, President and Chief Executive Officer of RF IDEas.

For more than 30 years ProfitKey has been delivering solutions built around the business of manufacturing -- from the front office to the shop floor. Its more than 1,200 customers have benefitted from ProfitKey's fully integrated product suite that provides robust document management and workflow capabilities, making it the only paperless manufacturing solution on the market.

"To ease the transition of our shop employees from paper time sheets to electronic attendance, we opted to go with RF IDEas readers and badges at all of the kiosks. These badges allow the employee to easily clock in or out by simply placing his ID badge on the reader, and by clicking start or stop on the touch screen, said Trent Upshaw of Taylor Forge Engineered Systems, a long-time ProfitKey customer. "We have programmed the badges with the Employee ID and their password, and the badge automatically sends a 'change employee' signal prior to entering the Employee ID. This ensures that each employee starts with a blank screen each time they clock in or out

About ProfitKey International www.profitkey.com

For 30 years, ProfitKey International has been a leader in providing Manufacturing application systems for small to mid-size (SMB) discrete manufacturers. We offer four major product lines that fulfill its strategy to provide Rapid Response Manufacturing. The four product lines are ERP, MES, eCommerce, and CRM.

About RF IDEas

Arlington Heights, IL-based RF IDEas designs, develops, and manufactures proximity and contactless reader solutions that expand building access cards to hundreds of workspace applications. The applications include employee identification, LAN access solutions, time/attendance, and enrollment - all using your existing building access proximity or contactless smart cards. Many of our solutions require absolutely no software to be deployed. Our desktop proximity and contactless reader solutions, Wiegand converters, and software bundles are capable of reading and expanding the functionality of nearly any existing contactless or proximity card or proximity badge used in facility access control.
