## ■ Electronic Dispatching

- View authorized traveler information upon login.
- Controlled viewing** of work-center assignments. See only the current assignment. See all assignments for the day or days; or any future number of operations. Allows only authorized operator(s) to work at a work center.
- Electronically dispatch** traveler/scheduler changes to the appropriate work centers **instantly**.
- Operate** paper-less or paper-lite. **Save paper costs.**
- Barcodes** are not required but can be utilized.

## ■ Document Management

Rapid MES includes the RRM Document Management module. All documents maintained in Item, Work Center, and Operations folders for the job being processed are viewable from the Operator

Console. Documents in folders can be printed on local or

## ■ Integrated with ERP's 'Operations Monitor' function.

## ■ Real time Integration with the RRM Database

**A separate MES database is not required.**

RRM Rapid MES is seamlessly integrated with all other RRM functions and modules including scheduling, dispatching, and costing. Information collected via Rapid MES is viewable on a real time basis in the **Operations Monitor** function that is included in the standard ProfitKey RRM System.

## ■ Easy to Learn

Operators can learn how to use the Operator Console in less than an hour. Full implementation requires just one on-site day.

## ■ Flexible Configuration

A single LAN Client PC can serve multiple operators or be used as a kiosk. Front office seats are not needed. Rapid MES is licensed on a flat fee basis.

## ■ Optional Document Viewer

Separate 3rd party software can be licensed to provide viewing access to 250 different document and drawing types. The viewer also provides markup capability without changing the original drawing.
