

# ProfitKey Announces New Release of its ERP Solution

**Salem, NH, October 30, 2020** – ProfitKey, a leading provider of ERP solutions and services for small and medium-size custom manufacturers and job shops, today announced the new release of its PK 8 ERP Solution. Release 8.1.5 will be available on Monday November 2, 2020 via download from the ProfitKey website.

PK 8.1.5 has more than 40 new enhancements in this release including...

### Multi-Level Shop Orders and Split Lot for Shop Orders

- Shop Orders with bill of material items classified as an ASM type, will now be able release multi-level Shop Orders for each ASM item. Additionally, Shop Orders can now be split during the manufacturing process.

### Return to Vendor Pack List

- A Packing List can now be generated during the vendor return process.

### Link Purchase Orders to Multiple Orders

- When manually adding a link to a Purchase Order, delivery schedule customers will now be able to select multiple orders to link the delivery scheduled to on the Link Form.

### Open Work Orders

- The Open Work Order form lists all open work orders currently on the shop floor, allowing the user to see what is late and when it is due. Work orders can be sorted by any field on that form - with a right click a deep dive into the order will show if material is available, where the order is on the floor and the status. From this form work order data can be viewed, split, and any needed changes made.

“We are very excited to release PK 8.1.5,” said ProfitKey CEO Kevin O’Keefe. “We focus on listening to our customers’ needs and translating them into new functionality. PK 8.1.5 is our response to 37 different enhancement requests from our customers, and another 8 enhancements we have added on our own.” ProfitKey will be hosting webinars for their customers in November where they can learn about the details of the PK 8.1.5 enhancements and ask our developers questions.
